Summary

Full Stack Developer skilled in building scalable MERN applications with hands-on experience in AI-powered platforms, **RESTful APIs**, authentication systems, and responsive frontend development. Strong foundation in **React.js**, **Node.js**, **MongoDB**, and modern JavaScript with a focus on clean architecture, performance optimization, and intuitive user experiences. Passionate about solving real-world problems through efficient and scalable web solutions.

Skills

Frontend	JavaScript (ES6+), ReactJS, React Router, Redux, Redux Toolkit, Tailwind CSS, Material UI
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication
Database	MongoDB (Mongoose), SQL Server
Developer Tools	Git, GitHub, Postman, Axios, Puppeteer, pdf-parse, Netlify, Render, VS Code
Concepts	MVC Architecture, State Management (Redux Toolkit), Role-Based Access Control

Experience

Full Stack Developer Intern

Jul 2025 – Nov 2025

Decentralclasses

Remote

- Implemented **Google OAuth 2.0 authentication** for secure user login and seamless account access.
- Assisted in **content updates**, project coordination, and timely delivery of **feature enhancements** for the platform.
- Optimized **frontend components** for better **responsiveness**, **performance**, and faster load times.

Projects

GenAI – AI Interview Preparation & Resume Tailoring System

[Live](#)

- Built a full-stack AI interview preparation platform using **MERN stack** and **Google Gemini API** to streamline interview readiness.
- Implemented **resume-JD matching** pipeline to generate **match scores**, targeted interview questions, and skill gap analysis.
- Generated **ATS-friendly resumes** using **Puppeteer** with structured AI outputs validated through **Zod schema** for accuracy.
- Implemented secure **JWT-based authentication** with protected **REST APIs** and scalable **MongoDB/Mongoose** schemas for session management.
- Tech Stack:** React, Node.js, Express.js, MongoDB, Google Gemini API, Puppeteer, JWT, Zod, Tailwind CSS

Wanderlust – Hotel Booking Platform

[Live](#)

- Built a **full-stack hotel booking platform** using **Node.js**, **Express.js**, and **MongoDB** enabling users to explore listings and manage bookings.
- Implemented **JWT-based authentication**, authorization middleware, session handling, and **role-based access control** for data security.
- Designed **RESTful APIs** with complete **CRUD** functionality for property listings, user management, and booking services.
- Followed **MVC architecture** and modular backend design principles for maintainability, scalability, and structured development.
- Tech Stack:** Node.js, Express.js, MongoDB, Mongoose, JWT, EJS, REST APIs, MVC Architecture

SummarizeAI – AI Article Summarizer

[Live](#)

- Built an **AI-powered article summarizer** using **React**, **Redux Toolkit**, and **RapidAPI** for real-time web content text processing.
- Designed a **responsive UI** with **Tailwind CSS** and implemented optimized **API handling** with loading and error states.
- Developed **URL-based input functionality** to dynamically extract and summarize web content on demand.
- Tech Stack:** React, Redux Toolkit, Tailwind CSS, RapidAPI, JavaScript

Education

JSS Academy of Technical Education

B.Tech in Information Technology (CGPA: 7.0)

Noida, Uttar Pradesh

Aug 2021 – May 2025

BBL Public School

Intermediate (Class XII) — 89.6%

Bareilly, Uttar Pradesh

2019 – 2020

BBL Public School

High School (Class X) — 91.4%

Bareilly, Uttar Pradesh

2017 – 2018
